

## HAZOP with

HAZOP is the most utilised tool in the Process Safety arsenal and its effective operation is critical to the management of risk across our industry.

It forms the basis for other activities such as ATEX, Seveso, SIL, LOPA etc. and underlies most of the process safety activity of any site.

Fleming Professional's structured approach ensures that this vital activity is both rigorous and efficient.

- **Best Practice methodology compliant with IChemE and other standards**
- **Up to the minute software – PHA-Pro 7<sup>®</sup> and HAZOP Manager<sup>®</sup>**
- **Highly trained and experienced chairpersons**
- **Planning and preparation to enhance HAZOP quality and reduce duration**
- **Management of team dynamics to maximise effectiveness**
- **Use of built-in risk targets and qualitative risk assessment to minimise spurious actions**
- **Integration with LOPA and SIL assessments**
- **Top quality documentation**
